PROFESSIONAL SUMMARY

QA Automation Engineer with **2+ years** of experience ensuring the quality of a production HR and Payroll SaaS platform serving clients across Latin America. I combine **manual and automated testing**: functional, regression, integration, API and performance testing, with the regression suite automated in Cypress and Postman on CI/CD pipelines (Jenkins). I turn business knowledge into testing strategies that surface risks early, working in agile teams alongside Development, Product and Business Analysis.

2+ years in QA · Regression automated with Cypress + Postman on CI/CD · Performance validated at up to 2,000 employees per minute · 10+ QA interns trained

PROFESSIONAL EXPERIENCE

QA Analyst & Automation — Visma LatAm

April 2024 – July 2026 · Argentina · Hybrid

HR and Payroll SaaS platform: digitally signed payslips, vacation and leave management, and employee lifecycle.

- Automated the regression suite with **Cypress and Postman integrated into the CI/CD pipeline (Jenkins)**, migrating manual checks to automated ones and cutting the regression cycle **from 2 days to 3 hours**.
- Designed and executed **manual and automated tests** — functional, regression, integration and API — for every release, writing test plans and test cases and reporting defects based on business risk.
- Ran **performance tests with JMeter** validating **1,000 to 2,000 employees per minute** signing payslips and running other web transactions with no application downtime, and analysed the resulting stability metrics in AWS.
- Validated **integrations across HR, Payroll and Performance Management**, using SQL to verify data consistency and business process continuity between applications.
- Managed issues and requirements in **Jira** alongside Development, Product and Business Analysis in **Scrum and Kanban** environments, and documented features and QA processes in Confluence, building the reference material used for team onboarding and test traceability.
- Trained and mentored **10+ QA interns**, accelerating their autonomy and adoption of QA best practices.

PROJECTS & PORTFOLIO

Ticketazo — End-to-End Automation with Cypress

Capstone project · QA Automation, Santex & TWPF (2025)

End-to-end automation of functional and non-functional test cases on a real ticket-sales platform, covering positive and negative scenarios, with collaborative work on GitHub under an agile methodology. [Source on GitHub →](#)

Sociedad Patitas — NGO Website

Capstone project · Web Development, CoderHouse (2026)

Responsible dog adoption website built from scratch through deployment: responsive layout, SASS-based style architecture, semantic HTML and SEO. [Project →](#) · [Source on GitHub](#)

TECHNICAL SKILLS

Testing: Manual and automated testing · Functional · Regression · Integration · APIs · Performance · Test plans and test cases · Defect reporting

Automation: Cypress · Postman · Selenium · JMeter · Jenkins (CI/CD) · Git · GitHub · Playwright (learning)

Data & code: SQL (MySQL / PostgreSQL) · JavaScript · Python · AWS

Agile & tools: Jira · Confluence · Scrum · Kanban · Slack · VS Code

AI applied to QA: Claude Code · Claude (agents, subagents, agent skills) · ChatGPT · Gemini

EDUCATION

Associate Degree in Data Science and Artificial Intelligence — IFTS N.º 18, Buenos Aires · 2025 – in progress

Application Development — CoderHouse · 2026 – in progress

CERTIFICATIONS

- QA Automation** — XAcademy Santex & Technology with Purpose Foundation (2025)
- Professional Testing Master** — UTN FRBA e-Learning Centre (2024)
- Manual and Automated QA** — Argentina Programa & MindHub (2023)
- Claude: Subagents & Agent Skills** — Anthropic (2026)

LANGUAGES

Spanish — native · **English** — intermediate (B1), technical reading and documentation
