PROFESSIONAL PROFILE

QA Analyst with more than 2 years ensuring quality on a **SaaS HR and Payroll platform** for LatAm clients. I design, code and maintain **automated regression suites in Cypress and Postman** integrated into the **CI/CD pipeline (Jenkins)**. I run **functional, regression, integration, API and performance tests** based on business risk. I participated as tester of an internal **Generative AI tool**, checking functional validity and output consistency. I turn requirements into traceable test plans in agile teams (**Scrum/Kanban**) together with Development, Product and Functional Analysis.

Regression from 2 days to 3 hours with CI/CD automation · 60 sprints validated end-to-end · Performance sustained up to 2,000 employees/min · 10+ QA trainees mentored

TECHNICAL STACK

Automation: Cypress · Postman · Selenium · JMeter · Playwright (learning)

CI/CD and version control: Jenkins · Git · GitHub · GitHub Actions

Languages and data: JavaScript · TypeScript · Python · SQL (MySQL / PostgreSQL) · AWS

Management and agile: Jira · Confluence · Scrum · Kanban

AI applied to QA: Generative AI testing · Claude Code · ChatGPT · Gemini

PROFESSIONAL EXPERIENCE

QA Analyst & Automation — Visma LatAm April 2024 — July 2026 · Argentina · Hybrid

SaaS HR and Payroll platform in production: digital-signature payslips, leave management and employee lifecycle.

- Designed, coded and maintained the **automated regression in Cypress and Postman**, moving manual checks to automated ones and reducing the regression cycle from **2 days to 3 hours**.
- Integrated and ran the automated suites in the **CI/CD pipeline (Jenkins)**, keeping regression running on every release.
- Built automated scripts for **web UI and APIs**, covering functional, regression, integration and API tests on each release.
- Participated as tester of an internal **Generative AI tool** for test case and Postman flow generation, checking **functional validity, requirement accuracy and output consistency**.
- Turned acceptance criteria and user stories into traceable test plans and test cases across **60 sprints validated end-to-end**.
- Set up and ran **load and stress tests with JMeter**, validating the entry of **1,000 to 2,000 employees per minute** with no crashes, and analyzed stability metrics in **AWS**.
- Validated **integrations between HR, Payroll and Performance Management**, using **PostgreSQL** to check data consistency across applications.
- Documented QA processes in **Confluence**, creating reference material for onboarding and test traceability. Trained **more than 10 trainees** in team processes and tools.

PROJECTS

Ticketazo — E2E Automation with Cypress · QA Automation, Santex & TWPF (2025)

End-to-end automation of functional and non-functional test cases on a real ticket-selling platform, with positive and negative scenarios, collaborative work on GitHub and agile methodology. [GitHub](#)

Bilingual Portfolio & CV — Personal Project · TypeScript · GitHub Actions (2026)

Bilingual ES/EN portfolio with typed content in TypeScript and a GitHub Actions pipeline that builds and deploys on each push to main. [View site](#)

Sociedad Patitas — Website for NGO · Web Development, CoderHouse (2026)

Responsible pet adoption site built from scratch to deployment: responsive layout, SASS, semantic HTML and SEO. [View site](#) · [GitHub](#)

EDUCATION, CERTIFICATIONS & LANGUAGES

QA Automation — Santex (2025) · **Professional Testing Master** — UTN FRBA (2024) · **QA Manual & Automated** — Argentina Programa (2023) · **QA Engineer** — Udemy (2025)

Claude: Subagents & Agent Skills — Anthropic (2026)

Application Development — CoderHouse · in progress (JavaScript, React)

LANGUAGES

Languages: native Spanish · intermediate English (B1), technical reading and documentation
