PROFESSIONAL SUMMARY

QA Analyst & Automation with 2+ years of experience on a **production SaaS platform for HR and Payroll** serving LatAm clients. In this domain, a bug does not just create a ticket - it causes a wrong paycheck. I built and maintained the **automated regression suite in Cypress and Postman**, integrated it into the Jenkins pipeline, and **reduced the full cycle from 1 day to 1 hour**. I cover functional, regression, integration, API and performance testing, and I use **SQL** to check data consistency across integrated systems. I use **generative AI** as a productivity tool in QA and I also **test AI agents and skills**. I trained 10+ interns and wrote the team's reference documentation in Confluence.

60 sprints validated end-to-end · Regression cut from 1 day to 1 hour · 1,000-2,000 employees/min validated under load · 10+ interns trained

TECHNICAL SKILLS

Automation: Cypress · Playwright · Postman · Selenium · JMeter · web UI and API service automation (REST APIs).

Test types: functional · regression · integration · API · performance and stress · manual and automated testing · root cause analysis.

CI/CD and version control: Jenkins · Git · GitHub · test suite execution on every release.

Languages and data: JavaScript · Python · SQL (MySQL / PostgreSQL) · AWS · data integrity and consistency validation across systems.

Management and Agile: Jira · Confluence · Scrum · Kanban · Slack · VS Code · technical and onboarding documentation.

AI applied to QA: generative AI as a productivity tool (test data generation, report analysis) · testing AI agents and skills that create test cases and Postman flows, validating the quality of their outputs (Claude Code, ChatGPT, Gemini).

PROFESSIONAL EXPERIENCE

QA Analyst & Automation - Visma LatAm April 2024 - July 2026 · Buenos Aires, Argentina · Hybrid

Production SaaS platform for HR and Payroll serving LatAm clients (digital-signature pay slips, leave management, and employee lifecycle).

- **Reduced the regression cycle from 1 day to 1 hour** by building and maintaining the automated suite in **Cypress and Postman**, and integrating it into the **Jenkins** pipeline.
- **Validated the onboarding of 1,000 to 2,000 employees per minute with no downtime** by setting up and running load and stress tests with **JMeter**, and analyzing stability metrics in **AWS**.
- Took part in **60 sprints validated end-to-end**, turning acceptance criteria and user stories into traceable test plans and test cases.
- Found **integration bugs not visible in the UI** by using **SQL** to check data consistency across HR, Payroll and Performance Management, before they affected real paychecks.
- Sped up bug fixing by analyzing execution reports to find if the root cause was infrastructure or code, and logging defects in **Jira** sorted by risk.
- Trained **10+ QA interns** and built the team's reference material by documenting features and processes in **Confluence**, reducing onboarding time.

PROJECTS

Ticketazo - E2E Automation Framework with Cypress · QA Automation Final Project · XAcademy, Santex & TWPF (2025)

End-to-end automation of functional and non-functional test cases on a real ticket sales platform. Positive and negative scenarios, collaborative work in GitHub with branches and Agile methodology. github.com/sharonrodriguez22/TicketazoG10Automatizado

Sociedad Patitas - Adoption Simulator with JavaScript · JavaScript Final Project · CoderHouse (2026)

Interactive app with external API consumption (Fetch, async/await), DOM manipulation, localStorage/sessionStorage persistence, form validation, error handling (try/catch) and third-party libraries (SweetAlert2, Toastify). github.com/sharonrodriguez22/sociedad-patitas-js

EDUCATION AND CERTIFICATIONS

Application Development Program (Web Development, JavaScript and React JS) - CoderHouse · in progress

Data Science and Artificial Intelligence Degree - IFTS No. 18 · in progress

Claude: Subagents & Agent Skills - Anthropic (2026)

QA Automation - XAcademy, Santex & TWPF (2025)

QA Engineer - Udemy (2025)

Professional Testing Master - UTN FRBA (2024)

Manual and Automated QA - Argentina Programa & MindHub (2023)

Languages: Spanish native · English intermediate (B1), technical reading and documentation.
